

Name Symbols

Based on geometry for quantum connection which create an illumination key.
The key raises vibrations from 3D to higher dimensions and connection with source.

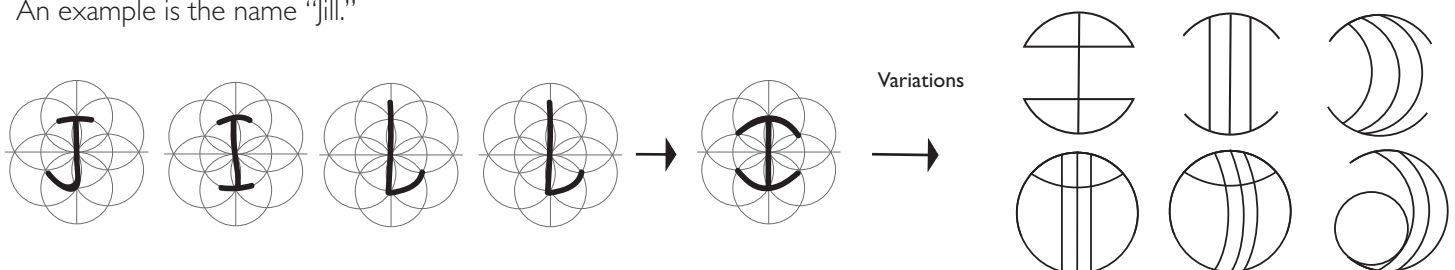

Create for self or others with the intent of sending
healing streams of grace for the greatest good of all.

Every letter of the alphabet is found in the Aligned with Life Symbol (seed of life combined with an equal-arm cross).
Every letter is found in one symbol = every word is in one symbol = everything is connected on all planes, dimensions, realms and illusions of time.

Name symbols encourage individuals to recall their power and connect on a higher dimension. To align with life.
Each Name Symbol begins with the basic shape and takes on unique traits, reflecting the soul needs of the moment.

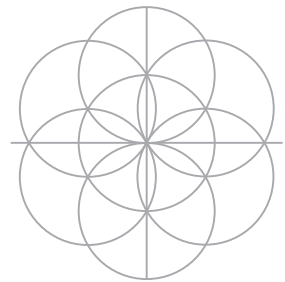

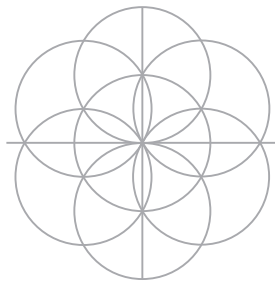

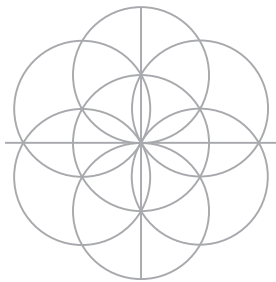

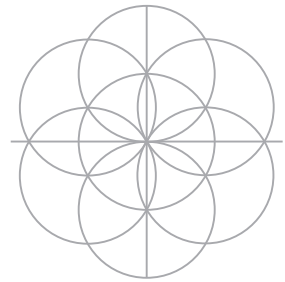

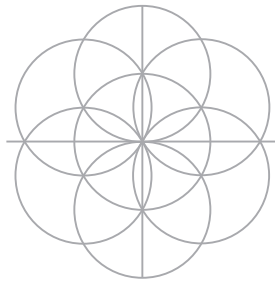

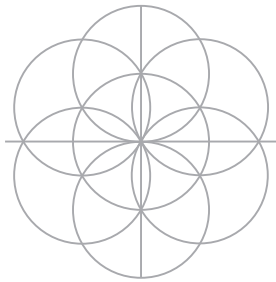

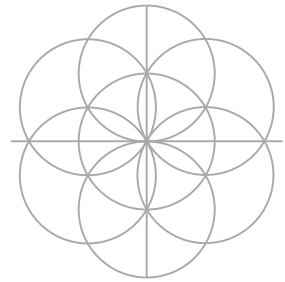

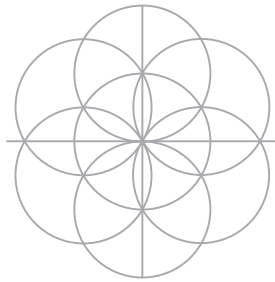

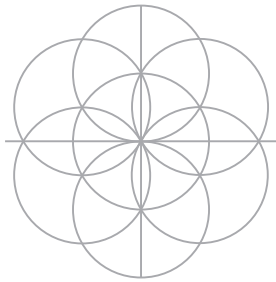

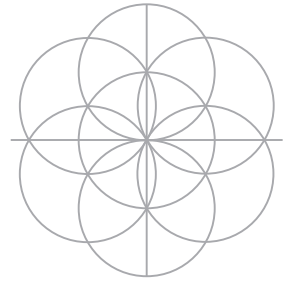

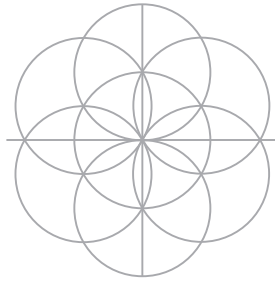

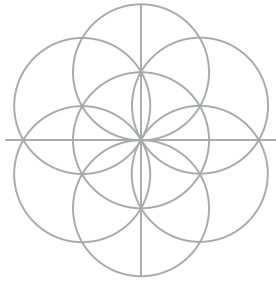

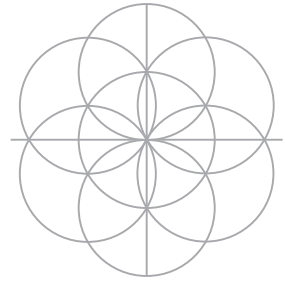

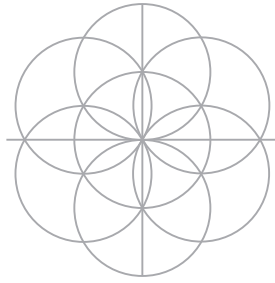

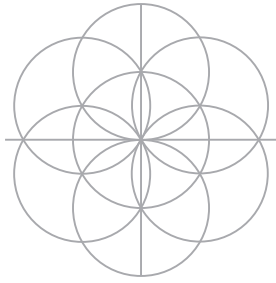

An example is the name "Jill."
